

# **Appendix Q**

## **Information Technologies**

## **Local**

### **Novell Groupwise**

This is the email system used by the Garrett County Health Department. E-mail addresses have been established for each Incident Command position. These positions are located in the state's address book. Each position has a user id and password. User ID's, passwords, and phone numbers for each position are located in Appendix K on page 7.

### **Sharepoint-Garrett County Health Department Intranet**

The following address <http://gchdsharepoint/default.aspx> will provide users within the health department network to gain access. Information related to an event may be posted on the intranet website. All employees have access to Sharepoint however some may have limited access to different areas in the site. Permissions may be changed to allow those without access to gain access.

### **Garrett County Health Department Internet Website**

[www.garretthealth.org](http://www.garretthealth.org)

### **Emergency Health Response Plan**

A person may access the health response plan with the appropriate user ID and password.

<http://www.garretthealth.org/preparedness/documents.htm>

### **PatTrac**

This is the client management software package utilized by the health department for billing and data collection for services provided in most departments within the health department.

**FluTrac-**A module within PatTrac used collect demographic information from persons obtaining influenza vaccine(s). This module allows for reporting and electronic billing for services provided during influenza clinics.

**PanTrac-** A module within PatTrac which may be used to help manage a catastrophic health event. Specific client data may be collected for surveillance, tracking, isolation, quarantine, and resource allocation.
