GARRETT COUNTY HEALTH DEPARTMENT
FY 2018 Annual Report
A Message from the Garrett County Health Officer

Those of us who live, work, and play in Garrett County are truly fortunate. We have a beautiful environment, friendly neighbors, and a great community spirit. In spite of these assets there are many challenges that we face including an aging population, economic pressure, emerging epidemics, and environmental challenges. The Garrett County Health Department’s mission is to promote, protect, and improve the health of our citizens and visitors. During the past year our dedicated staff has been focusing a great deal of attention on performance management and quality improvement in order to advance our overall community health outcomes. This work is challenging and also rewarding. Our program and administrative staff work tirelessly to address community needs through clinic and community-based programs, prevention campaigns, and enforcement of public health laws and regulations that protect and promote the health of our community.

During the past year, the Garret County Health Department has received a great deal of attention for MyGarrettCounty.com, our universal community planning tool. We are using MyGarrettCounty.com to increase our community engagement by providing a platform to engage our partners and constituents in addressing our health and wellness needs. We are also using it internally to monitor our progress and inform our decision making.

This annual report provides a snap shot of programs and services that are provided by the Garrett County Health Department, in collaboration with our partners and constituents, to achieve our mission as we strive to provide the 10 essential public health services identified by the National Centers for Disease Control and Prevention (CDC). We will continue to work to respond effectively through new and time tested approaches needed to address long standing and emergent problems.

Please browse our report and see for yourself the significant impact that your local health department has in this community. Also, please visit our website at garretthealth.org and our community planning tool at MyGarrettCounty.com to get more information, and engage other community members so that we may be able to continue to work together for a healthier tomorrow.

Bob Stephens, M.S.
Garrett County Health Officer

About the GCHD

Garrett County Health Department

The Garrett County Health Department has a total workforce of 177 employees. This workforce consists of 100 merit classification employees, 42 special pay employees, and 35 third party contractual employees, making the Garrett County Health Department the 12th largest employer in the county. The total operating budget is approximately $14,000,000, which funds 66 different programs. The Garrett County Health Department is funded by state core dollars, local core dollars, state targeted grants, direct federal grants, pass through federal funding, and fee for service programs.

The Health Officer is appointed by the Secretary of Health upon recommendation of County Commissioners. The Garrett County Board of Health consists of Garrett County Board of Commissioners with the Health Officer as Secretary. The Health Officer administers delegated programs from the Secretaries of Health and Environment. The Garrett County Health Department also administers ordinances adopted by the Garrett County Board of Health.
